SEO [REPRIMENT CON RAIL Description No Helphology Control of the Paragraph of	
ichi est [There is a ant on your balcony. It wants to leave the rail so sometimes it moves right and sometimes it moves left until it gets	\$\left(\)
	exhausted.Given an integer array A of size N which consists of integer 1 and -1 only representing ant's moves.	
EMPBIE	Where 1 means ant moved unit distance towards the right side and -1 means it moved unit distance towards the left . Your task is to find and return the integer value representing how many times the ant reaches back to original starting position.	,
E	is to find and return the integer value representing how many times the ant reaches back to original starting position. Note:	, AO
*		
CSEDAO	Assume that the railing extends infinitely on the either sides	,
